

Memo

To: Board of Directors
From: Karl B. Drew
Date: September 9, 2014
Subject: Review of District Salaries and Benefits

We have initiated the information gathering stage of the review of the District's salaries and benefits. We have not heard back from CalPERS about the steps that would be needed to transfer the payment of the employee contributions from the District back to the employees, so we are making a second request for that information. A request for Salary and Benefits information has been sent out to various water districts and agencies on the mountain and in the Southern California area. We have asked for responses to the survey to be returned by the end of the month and should have additional information for the board at next month's meeting.
