What is the Countywide Plan?

In 2010, the Board of Supervisors set out to establish a vision for the future of the county as a whole, and subsequently adopted a Countywide Vision in 2011 after two years of input from the community and the county's 24 cities and towns. Following the adoption of the Countywide Vision, which calls for the creation of a "complete county", the Board adopted the County paradigm and job statements in 2012.

In 2015, San Bernardino County launched an effort to go further than any county or city has ever gone with a general plan by creating a web-based comprehensive "complete county" plan.
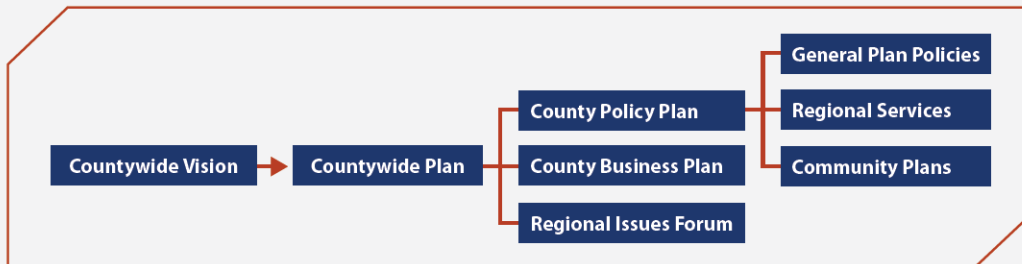

General plans are almost always strictly rule books for guiding development and growth. San Bernardino County's General Plan, last updated in 2007, will go well beyond a traditional general plan to become a comprehensive Countywide Plan that complements and informs the Countywide Vision by taking into account all services—not just land-use planning—provided by County Government, and the unique values and priorities of each unincorporated community. It will serve as a guide for County decision-making, financial planning, and communications.

With a target adoption date of 2018, the Countywide Plan's web-based format will provide a wealth of easily accessible data on how the County operates, and allow independent research using County data and information.

What are the Components of the Countywide Plan?

Driven by the Countywide Vision, the Countywide Plan will include:

- A County Policy Plan, which will be an update and expansion of the County's General Plan and Community Plans for the unincorporated areas. It will be a new approach to county planning with a Regional Services Plan for social services, healthcare services, public safety, and other regional county services in both incorporated and unincorporated areas. Additionally, an Environmental Impact Report will be prepared providing environmental clearance for the County Policy Plan and facilitate streamlined CEQA review for future planning and development projects.

- A County Business Plan, which will contain governance policies and operational metrics that outline the County's approach to providing municipal and regional services.

- A Regional Issues Forum, which will be an online resource for sharing information and resources related to issues confronting the County as a whole, including the work of the Countywide Vision element groups.
